GDPR/ePrivacy findings posture

Completed: 2026-08-24T00:00:20.000Z | Region: eu_ie

CertScore.ai score

Starting-page score

GDPR/ePrivacy evidence posture

Elevated Review Priority

The retained evidence indicates elevated review priority across consent, cookie disclosure and storage security reviews.

5	4	8
Findings	High / critical	Topics

Findings by severity

Retained findings

High / critical	4
Medium	1
Low / review	0

Findings by topic

		Details
Consent management	1	App. A
Cookies and similar technologies	1	App. B
Privacy policy	1	App. C
Forms	0	App. D
Webserver security	0	App. E
External services / domains	0	App. F
TLS	1	App. G
ADA/WCAG	1	App. H

Counts describe retained findings; zero does not establish absence or compliance.

Priority findings and next actions

1. Tracking before a recorded consent choice — High | App. A

Review the retained vendor requests and gate non-essential activity until a choice is recorded.

2. Cookie disclosure requires review — High | App. C

Compare retained cookie names with the published cookie notice and update the relevant disclosure.

3. Cookie security attributes need review — High | App. B

Review the retained cookie attributes and verify the appropriate security settings.

Scope: retained starting-page evidence and bounded capture windows.

Automated risk signals require verification. Detailed evidence and limitations follow.

Appendix A: Consent management

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

Privacy choices and notices

Unknown: verified privacy-choice and notice evidence was not retained. This does not establish absence.

GPC observations

No verified GPC assessment available; response remains unknown.

Consent control assessment

Accept control: Observed
Reject / necessary-only control: Observed
Options / settings control: Observed
Scope: initial visit, first layer.

Key findings

1. **Tracking before a recorded consent choice [High]**
   Retained example evidence for report layout testing.
   Why it matters: This finding identifies a potential barrier to clear information or effective visitor choices. Review the retained evidence and recommended fixes for the affected pages.
   Suggested review action: Review the retained vendor requests and gate non-essential activity until a choice is recorded.

Detailed GDPR / ePrivacy checklist

Checklist evidence is grouped under the matching topic appendix.

1. **Consent mechanism: Observed**
   A consent surface was retained.

Appendix B: Cookies and similar technologies

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

3. Cookie security attributes need review [High]

Retained example evidence for report layout testing.
Why it matters: Security and transport weaknesses can expose visitors- information or disrupt access to the site. Review the affected requests and pages.
Suggested review action: Review the retained cookie attributes and verify the appropriate security settings.

Cookie and storage inventory

Observed evidence from the bounded scan only.

Inventory summary: 1 retained cookies; 0 localStorage / sessionStorage rows. Service and domain observations are in Appendix F.

1. Cookie - Example Analytics

Purpose: Analytics | Evidence: Non-essential | Category: Analytics | Priority: High | Confidence: High
Observed: 1.25s after scan start | Pre-consent: Yes | Party: First Party | Site relationship: Same Site | Entity relationship: Same Entity
Name(s): _example | Domain(s): example.test
Observed records: 1; requests: 1; set by third-party script: No; timing basis: Before Consent Cookie Write
Attribution: example_analytics
Regulatory relevance: analytics

Appendix C: Privacy policy

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper: https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

Scan ID: 00000000-0000-0000-0000-000000000001. Completed: 2026-08-24T00:00:20.000Z. Generated: 2026-08-24T00:00:00.000Z. Duration: 19.0 seconds.

GDPR/ePrivacy focus. Observed from Ireland. Changing review focus uses the same evidence.

GDPR / ePrivacy evidence overview

Evidence review score: 82/100 (evidence coverage indicator, not a compliance score)
Coverage retained.
Review targeted rows.

Summary counts: 0 observed gaps; 1 potential concerns; 0 review signals; 0 technical limitations.

2. Cookie disclosure requires review [High]

Retained example evidence for report layout testing.
Why it matters: This finding identifies a potential barrier to clear information or effective visitor choices. Review the retained evidence and recommended fixes for the affected pages.
Suggested review action: Compare retained cookie names with the published cookie notice and update the relevant disclosure.

Scope and limitations

Pre Interaction Observation Only: No consent controls were clicked.

Method: the report projects persisted scanner evidence through normalized concerns, concern policy, unified findings, and the GDPR/ePrivacy checklist. The download does not create or upgrade findings from display context.

Observed evidence only.

GDPR Transparency

Persisted transparency rows only.

Transparency summary: 1 rows; 1 observed; 0 not confirmed; 0 no match found.

1. Controller/contact disclosure: Observed

Controller contact evidence was retained.

Assessment: Checked | Evidence state: Observed | Direction: Positive Signal

Appendix D: Forms

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

Data collection surfaces

Persisted read-only collection-surface assessment only.

Inventory summary: 1 retained forms; 1 retained fields; assessment Observed.

The retained read-only main-document inventory is listed below.

Assessed page: https://example.test/contact

Coverage: Complete; document scope Main Document; interaction mode None; inspected 1 form candidates and 1 field candidates.

1. Contact form

Page: https://example.test/contact | Structure: Native Form | Surface type: Contact | Method: Post
Action: Self | Fields retained: 1 of 1 | Truncated: No | Confidence: 95% | Basis: Direct

Form evidence references: form-ref-1

Field 1: Work email; element Input; input type Email; category Email; required Yes; state available; autocomplete email; confidence 95%; basis Direct.

Field evidence references: field-ref-1

Appendix E: Webserver security

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

Bounded starting-page transport evidence only. Missing evidence remains unknown; these checks do not establish complete server security.

No persisted transport checklist rows were retained for this topic.

Appendix F: External services / domains

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

Service and domain inventory

Observed evidence from the bounded scan only.
0 retained service / tracker rows. 0 total inventory rows omitted by the export limit. Zero retained rows do not establish absence.

Appendix G: TLS

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

Bounded starting-page transport evidence only. Missing evidence remains unknown; these checks do not establish complete server security.

1. Valid SSL/TLS certificate: Observed

The retained TLS probe verified the origin certificate.

Assessment: Checked | Evidence state: Observed | Direction: Positive Signal

Finding 1. TLS certificate review [Medium]

Retained TLS evidence requires review.
Why it matters: Security and transport weaknesses can expose visitors- information or disrupt access to the site. Review the affected requests and pages.

Appendix H: ADA/WCAG

Scan: example.test. GDPR/ePrivacy review; supporting topic evidence.

Technical workpaper:
https://certscore.ai/api/scans/00000000-0000-0000-0000-000000000001/report-export?format=json&reviewFocus=gdpr_eprivacy

4. Accessible names require review [Critical]

Why it matters: Missing labels, low contrast and other accessibility barriers can prevent people using assistive technology from reading content or completing tasks. Review the retained WCAG examples and test the affected journeys.

Automated starting-page accessibility evidence supporting ADA/WCAG review. This is not an ADA compliance determination or a complete WCAG conformance audit. Manual review is required.

Automated audit: completed; engine axe-core 4.11.3; failed rules 4; affected nodes 4; rules needing review 0.

Assessed page: https://example.com/

Limitations: None recorded for this bounded audit

Automated rule evidence: image-alt

Fix image-alt. Observed image-alt

Tags: wcag2a; impact serious; 1 affected nodes.

Guidance: https://dequeuniversity.com/rules/axe/4.11/image-alt

Selector: #image-alt. Fix image-alt

Automated rule evidence: label

Fix label. Observed label

Tags: wcag2a; impact serious; 1 affected nodes.

Guidance: https://dequeuniversity.com/rules/axe/4.11/label

Selector: #label. Fix label

Automated rule evidence: button-name

Fix button-name. Observed button-name

Tags: wcag2a; impact serious; 1 affected nodes.

Guidance: https://dequeuniversity.com/rules/axe/4.11/button-name

Selector: #button-name. Fix button-name

Automated rule evidence: color-contrast

Fix color-contrast. Observed color-contrast

Tags: wcag2a; impact serious; 1 affected nodes.

Guidance: https://dequeuniversity.com/rules/axe/4.11/color-contrast

Selector: #color-contrast. Fix color-contrast
